

Liberate Your Staff from their Desk – With Executive Mobile

When you've been out on the road for hours or even days on end, your mobile device turns into your lifeline back to the office.

With Executive Mobile you can work as if you're in the office, even when you're away from your desk.

Add Value to Your Mobile

Zeacom's Executive Mobile application provides you with the smart features of your ZCC Unified Communications system, so that you can always stay in touch with the office.

You can access your landline information via your mobile – so you can see at a glance who has called your desk phone, scroll through your messages that are listed by name, select the ones you want to hear, and listen to them by simply pressing a button.

You also have the ability at your fingertips to find any phone number you need in the Corporate Contact Directory – whether that's one of your colleagues' numbers or one of your customers – and connect with a single button click.

To make sure you can talk to a live person, without getting caught in voice mail jail, you can see whether your colleagues are active at their desk before you call them, or when they're set to return from a meeting.

Executive Mobile will save you time and frustration while you're out and about on business. You'll make it much easier for yourself and your customers to stay in touch, and you can handle your communications as effectively as possible.

Key Benefits

ZCC Executive Mobile provides you with advanced UC functionality on the one communications device you always carry with you. In case you urgently need to talk to an expert back in the office, you can use ZCC Presence to see who is at their desk and whether they're on the phone or not. Simply press a button to talk, and you'll avoid those time-wasting telephone tag games, as each call makes contact.

In addition, the ZCC Phonebook gives you instant access to the company's entire business directory as well as your personal contacts, so you can easily find the contact details of all customers, suppliers or partners – instead of just those you've entered into the 'Names' list on your mobile. You'll never need to manually enter phone numbers on your 'Names' list again.

With ZCC Executive Mobile, you'll have access to a raft of smart Unified Communications features that will help you be more productive while you're on the road.

Make the smart connection

- Save time as you check your mobile and landline messages in one place
- Be more responsive, as you view who has been trying to get hold of you in your Call History list
- Prioritize messages before you listen – View caller details
- When you see a message from a caller you've been waiting on, you'll know it's time to make contact
- Avoid wasting time calling colleagues who are not at their desk – See when they're due back and you'll make sure that each call makes contact
- Avoid the time-consuming task of finding and keying in numbers – Use the company directory
- Avoid the confusion and duplication of maintaining multiple contact lists
- Remotely control your Presence availability information, to tell callers when you're contactable and when not
- Increase your personal efficiency

- Achieve greater productivity while you're away from your desk
- Do better business, more quickly
- With ZCC Executive Mobile you are always in control of your communications – Even when you're out

A Handy Mobility Web Portal

The ZCC Executive Mobile functionality comes with a Web Portal to give you easy access to your mobility features.

You can use a browser or your mobile phone to remotely access your applications.

- Interface with your ZCC Mailbox to view your voice messages summary (New / Read / Saved)
- See who called while you were unavailable and call them back instantly – just press a button
- View your call history (Missed / Recent)
- Use ZCC Executive Mobile to select or update your ZCC Presence profile, including your schedule and expected time of return
- Access the ZCC Phonebook to look up and dial numbers in either your personal or the company directory
- Access ZCC Presence to check the availability of your colleagues back in the office. You'll only call them when you know they are free.

A Range of Mobiles

Our ZCC Executive Mobile application is an 'Early Introduction' module. It is currently supported on Windows Mobile v5 and v6 mobiles, and a range of devices such as:

- BlackBerry 8830
- Nokia N95, E51, 6121
- Sony Ericsson P990
- Palm Treo
- Okta Boss, Agent and Touch (HTC phones provided by Sprint)
- Samsung SCH-1760

Simply log in, during a quiet moment, and check your messages or change your Presence profile

Required Modules

Each ZCC Executive Mobile user requires one of the following applications*:

- ZCC Executive Desktop – ZCC Executive Mobile was designed to fully complement ZCC Executive Desktop
- ZCC Agent Desktop
- ZCC Executive Outlook

Licensing

ZCC Executive Mobile is a PBX platform generic application. A license is required.
